**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being fully anticipated by Fieres et al. (6,178,504 B1).

Claim 1: Fieres teaches authenticating the information using a digital signature (col. 8, lines 49-55) where it is inherent that a key is necessary and present to validate the signature, hashing sum of the application code image (col. 8, lines 51), a certificate contains identifying attributes of the application which are used to accurately identify an application (col. 8, lines 49-55) and a signature validation process can be applied to the applet to verify that the applet has been signed by a trusted entity (col. 10, lines 32-34)

where the applet is allowed to run after integrity checks are confirmed (col. 10, lines 34-35), the architecture provides the concepts of a class of service where COS identifiers label the resource (col. 10, lines 45-49), acquire access to resources according to the application assigned capabilities and execute application methods in a secure location (col. 10, lines 51-59); they are signed by the ICF domain authority and the COS identifiers are evaluated before access to the method is granted (col. 11, lines 13-16), requested attributes are compared to a set of privilege attributes (col. 12, lines 23-25) where if the result is positive the caller is allowed to go ahead (col. 12, lines 25-26), and it is inherent that if the result is negative then services are denied.
